# ABOUT GROHE

GROHE is the world's leading manufacturer of premium quality sanitary fittings. Originating from Germany we are a truly global brand offering award-winning product designs and technologies in over 130 countries. With a wide variety of products created to the very highest functional, aesthetic and sustainable standards, we are dedicated to delivering the best possible experience using the least amount of water. All of our products are created to deliver the perfect balance of superior technology, functional quality and attractive design.

## Iconic Design

GROHE believe that innovation in functional technology and aesthetic design should go hand-in-hand. We have been delivering stylish and high performing sanitary fittings for over 70 years resulting in a string of awards and the development of some of the most innovative products in the industry.

## Superior Quality

High quality manufacturing is the fundamental cornerstone of our entire product range from concealed water flushing solutions to ultra-precise kitchen taps. Featuring superb quality German engineering and industry-leading longevity our superior manufacturing is evident right across a diverse product range. Every new product is lifecycle-tested before launch and will always exceed the highest international standards in quality and reliability, reiterated by independent 'best in test' wins.

## Advanced Technology and Environmental Innovation

Seven decades of cutting edge sanitary fitting research has resulted in the development of technologies designed to enhance every aspect of our product range. Our corporate commitment, known as WaterCare®, ensures we are dedicated to developing these solutions using first class materials to design water-efficient products that respect natural resources. Our advanced technologies include:

### GROHE EcoJoy®

High quality, award-winning and sustainable technology that lowers water and energy bills by reducing water usage up to 65%. EcoJoy® products are on The Water Technology List and can offer tax benefits to companies.

### GROHE CoolTouch®

Chrome surfaces are kept at a constant, cool temperature to eliminate the risk of scalding.

### GROHE DreamSpray®

The leading technology at the heart our shower function, Dreamspray enables optimal water distribution through every nozzle saving up to 30% of water usage.

### GROHE SilkMove®

Smooth and ultra-precise single-lever mixer control helps to save water by ensuring optimum performance. This has been independently verified as a 'best in test' technology.

### GROHE StarLight®

Immaculate and radiant chrome surfaces that keep a dazzling shine throughout a lifetime of use.

### GROHE TurboStat®

Temperature control technology that reaches the desired temperature 40% faster using 20% less energy and reacts instantly to pressure changes.

## WORKING WITH GROHE

---

We believe that exceptional quality products deserve an exceptional service delivery that puts our customers' requirements first. With an established track record of implementing a wide variety of customer solutions we have developed the capacity to deliver our products effectively under any circumstances. In order to do this a dedicated team of experts will take you through our working approach "concept to completion" that features the following key steps:

### 1. Concept

A GROHE Specification Manager will visit your organisation to collect all of the information necessary to create a comprehensive product proposal specific to your requirements. Once developed this will be sent to you along with a sample support package for your review.

### 2. Project Management

With our expert hands-on support we can deliver even the most demanding of projects on time, on budget and to your satisfaction.

### 3. Training Support

We offer full training support for all installation, maintenance and building management personnel. This enables simplified upkeep and allows you to take full advantage of our exceptional product longevity.

### 4. Completion

Our project management experience will ensure your solution is delivered successfully and we will leave you protected by our comprehensive product guarantees for years to come.

## MEETING YOUR NEEDS

---

Whatever your sanitary fitting requirements may be, we have high quality solutions that will meet your needs and exceed your expectations. For more information or to arrange a business development manager visit to determine your precise requirements and provide you with a no obligation quote please contact [projects@grohe.co.uk](mailto:projects@grohe.co.uk). For more about our expansive product portfolios and to stay up to date with the latest developments here at GROHE, please visit our website at [www.grohe.co.uk](http://www.grohe.co.uk) and sign up for our projects newsletter.

Please email [projects-uk@grohe.com](mailto:projects-uk@grohe.com) for more information.

# ASSURED QUALITY AND COMPLIANCE

---

**GROHE products are of the highest engineering quality and are designed to fully comply with all relevant healthcare codes; HTM64, HTM 04-01 Part A, WRAS and D08.**

By installing our sanitary fittings you can have confidence that your building will achieve regulatory approval whether it's a new build or a refurbishment. We can provide you with equipment that is suitable for both clinical and non-clinical areas and will meet demanding washing and disposal requirements. We take our sanitary fittings through extensive lifecycle testing to make sure they are of the highest levels of reliability and durability.

We have the expertise required to make your building project run successfully and will provide our products fully sealed and operational to minimise setup time and simplify maintenance. In addition, infection control is as important to us as it is to you and is one of our key considerations when selecting or designing products for healthcare clients. Our sanitary fittings are easy to clean and minimise ingress areas where bacteria can accumulate giving you the peace of mind needed to use and enjoy them fully.

# EFFECTIVE HEALTHCARE SOLUTIONS

---

GROHE have substantial experience in partnering with healthcare establishments to provide sanitary brassware solutions that meet their demanding requirements.

From large NHS hospitals to private nursing homes our expert design and project management teams will consider both staff and patient needs to develop the most effective solution for you. We will incorporate a range of advanced technologies into the development of your solution and can also save water through sophisticated temperature and flow rate controls, lowering your monthly costs whilst still providing industry-leading performance.

# CONCEPT TO COMPLETION

---

We match our high quality products with a high quality project implementation service. Our **'Projects Specification Charter'** is an agreement we make to ensure that each and every client receives the solution they expect and where possible that we **exceed expectations** in terms of service and support.

We work with you to carry out **staff training, site preparation and product installation** effectively and efficiently putting your needs first at every stage. You will have access to **dedicated project managers**, with plenty of experience in successfully delivering projects similar to yours. Working with you every step of the way we provide an expert calibration service, alongside dedicated **ongoing technical support**, following implementation to ensure that all products are ready to function and saving you time and effort.

# CASE STUDIES

---

## Case Study 1

### The Harley Street Clinic

GROHE provides a comprehensive range of sanitary fittings to this world class private hospital based in London and has served as a valued partner for a number of years. The Harley Street Clinic is a leading independent centre for paediatrics as well as providing high quality neuroscience, cardiac and cancer treatment facilities. It requires high performance sanitary solutions that are reliable, durable and can be used effectively in clinical environments. We are happy to provide Harley Street with the level of service, water provision, waste management and cleanliness they require and have exceeded expectations as only GROHE can.

**“The market place offers little with such long-term value for money whether it is Thermostatic showers or taps. I would not hesitate to recommend GROHE to any healthcare professional requiring a quality product.”**

Mr. Vic Hensher Harley Street Clinic Estates and Project manager

## Case Study 2

### C&B Systems

For over 12 years C&B Systems have selected GROHE products for use in their Mediserve Systems for healthcare establishments. Mediserve systems are pre-plumbed, factory assembled product kits developed to provide both new and existing hospitals with a tested and approved sanitary solutions. GROHE products, including showers, taps, thermostats and sinks, provide the high quality and consistent performance that C&B Systems require whilst consistently delivering component designs that enhance their Mediserve solutions.
